

Longevity Strategy Guide

Live Long, Live Well

The Longevity Mindset

Longevity isn't just about living longer.
It's about living BETTER, longer.

Healthspan > Lifespan

Goal: Maintain physical, mental, and cognitive function well into your 80s, 90s, and beyond.

The Four Horsemen of Death:

1. Heart disease
2. Cancer
3. Neurodegenerative disease
4. Metabolic disease

All are largely preventable through lifestyle.

Exercise for Longevity

The #1 Longevity Intervention: Exercise

Strength Training (3-4x/week):

- Preserves muscle mass
- Maintains bone density
- Improves metabolic health
- Reduces fall risk
- Enhances quality of life

Cardiovascular Training:

- Zone 2 cardio (80%): 150-180 min/week
- VO2 max training (20%): 1-2x/week

Mobility & Balance:

- Daily stretching

- Yoga or Pilates
- Balance exercises
- Functional movement

Nutrition for Longevity

Protein: The Longevity Macronutrient

- 1g per pound of body weight
- Preserves muscle mass
- Supports metabolic health
- Enhances satiety

Micronutrients:

- Omega-3s (fish, algae)
- Vitamin D (sun, supplements)
- Magnesium (greens, nuts)
- Polyphenols (berries, tea)

Caloric Restriction (Optional):

- Time-restricted eating (16:8)
- Periodic fasting
- Calorie awareness

Foods to Emphasize:

- Vegetables (variety)
- Fruits (berries)
- Fish (fatty fish)
- Nuts & seeds
- Olive oil
- Legumes

Foods to Minimize:

- Processed foods
- Added sugars
- Trans fats
- Excessive alcohol

Sleep & Recovery

Sleep: The Foundation

- 7-9 hours nightly
- Consistent schedule
- Dark, cool room
- No screens before bed

Recovery Modalities:

- Massage
- Sauna (4x/week, 20 min, 170-180°F)
- Cold exposure (3x/week)
- Stretching/mobility
- Meditation

Stress Management:

- Breathwork
- Nature exposure
- Social connection
- Purpose & meaning

Cognitive Health

Brain Training:

- Learn new skills
- Read regularly
- Puzzles & games
- Language learning
- Musical instruments

Social Connection:

- Strong relationships = longer life
- Regular social interaction
- Meaningful conversations
- Community involvement

Mental Health:

- Therapy/counseling
- Meditation
- Gratitude practice
- Purpose-driven life

Longevity Supplements

Core Stack (Consult doctor first):

Vitamin D3: 2,000-5,000 IU

- Bone health
- Immune function
- Mood regulation

Omega-3 (EPA/DHA): 2-3g

- Heart health
- Brain function
- Inflammation reduction

Magnesium: 300-400mg

- Sleep quality
- Muscle function
- Stress management

Creatine: 5g daily

- Muscle preservation
- Cognitive function
- Energy production

Optional (Research-backed):

- NMN or NR (NAD+ boosters)
- Resveratrol
- Quercetin
- Berberine

The Longevity Scorecard

Weekly Assessment:

- Strength training (3-4 sessions)
- Zone 2 cardio (150+ min)
- Protein intake (1g/lb)
- Sleep (7-9 hours)
- Stress management (daily)
- Social connection
- Learning/growth

■ Purpose alignment

Goal: 7/8 checked weekly

Remember:

Longevity is a marathon, not a sprint.

Small, consistent actions compound over decades.
