

THE EXECUTIVE ENERGY SYSTEM

YOUR DAILY BLUEPRINT FOR PEAK PERFORMANCE

Print this premium reference guide and keep it at your desk. This is your roadmap to sustainable excellence—combining cutting-edge biohacking protocols with executive-level discipline. Transform your energy, optimize your performance, and unlock your full potential.

OPTIMIZE YOUR ENERGY: DAILY PROTOCOL CHECKLIST

MORNING ROUTINE (60 MIN)

WAKE & MEASURE

- Wake at consistent time (± 15 min)
- Check HRV (1 min) - Track trend

ACTIVATE & ENERGIZE

- Sunlight exposure (10-30 min) - No sunglasses
- Wim Hof breathing (10 min) - 3 rounds
- Cold shower (2-3 min) - Build resilience

FUEL & FOCUS

- High-protein breakfast (30-40g) - Within 90 min of waking
- Review Three-Horizon goals (5 min)
- START 90-min Flow Block - Peak cognitive work

MIDDAY PROTOCOL (30 MIN)

- Protein-rich lunch - Lower carbs to avoid crash
- 10-min walk - Preferably outside
- Box breathing if stressed (2 min) - 4-4-4-4 pattern

AFTERNOON ENERGY MANAGEMENT (2-4PM)

Energy dip is normal - Circadian rhythm

Choose ONE:

- 20-min power nap (set alarm)
- 10-min brisk walk (outside if possible)
- Low-stakes tasks (email, admin)

EVENING ROUTINE (90 MIN)

01

DINNER WITH COMPLEX CARBS

Supports sleep

02

SCREEN CUTOFF (90 MIN BEFORE BED)

Blue light kills melatonin

03

SAUNA OR HOT BATH (20 MIN)

3-4x/week

04

JOURNALING (10 MIN)

Process stress

05

COHERENT BREATHING (10 MIN)

5 sec in, 5 sec out

06

MAGNESIUM SUPPLEMENT (400MG)

Optional

07

BED AT CONSISTENT TIME

± 15 min

MASTER THE FRAMEWORKS: THE 10 CORE PERFORMANCE MODELS

1. THREE-HORIZON PERFORMANCE MODEL

- Horizon 1: Present performance (today-3 months)
- Horizon 2: Future capacity (1-3 years)
- Horizon 3: Long-term legacy (20+ years)
- Action: Optimize all three simultaneously

2. S.I.E.E.P. PROTOCOL

- Strategic Schedule - Same time daily
- Light Management - Sun AM, darkness PM
- Engineered Environment - Cool, dark, quiet
- Evening Routine - 60-min wind-down
- Performance Nutrition - No caffeine after 2pm

3. METABOLIC FLEXIBILITY MATRIX

- Protein: 0.7-1g per lb body weight
- Fats: 20-30% of calories (healthy sources)
- Carbs: Strategic timing (moderate AM, low midday, higher PM)
- Fasting: 12-hour eating window minimum

4. STRESS INOCULATION PROTOCOL

- Measure: HRV daily (higher = better recovery)
- Breathe: Box breathing before/during stress
- Expose: Voluntary stress (cold, HIIT, fasting)
- Recover: 24-48 hours after high stress

5. ENERGY PORTFOLIO MODEL

- Cognitive Energy: Peak 0-4 hours after waking
- Physical Energy: Dip at 2-3pm (normal)
- Emotional Energy: Depleted by conflict/decisions
- Action: Match tasks to energy levels

BUILD RESILIENCE: RECOVERY & FLOW PROTOCOLS

6. RECOVERY TRIAD

COLD

2-3 min daily (shower or ice bath)

HEAT

20 min sauna 3-4x/week

COMPRESSION

Legs-up-wall 10 min daily

7. FLOW ACTIVATION PROTOCOL

CHALLENGE

4% above current skill level

GOALS

Specific, clear targets

FEEDBACK

Immediate, real-time

FOCUS

90+ min uninterrupted

RESULT

500% productivity boost

8. ANTIFRAGILITY PROTOCOL

PHYSICAL

Hormetic stress (cold, HIIT, fasting)

MENTAL

Progressive exposure to discomfort

EMOTIONAL

Daily journaling, reframing

SOCIAL

Build support network

PURPOSE

Connect challenges to meaning

9. THREE BREATHWORK PROTOCOLS

BOX BREATHING

4-4-4-4 (calm/focus)

WIM HOF

30 breaths + hold (energy/clarity)

COHERENT

5-5 pattern (HRV optimization)

10. QUANTIFIED WELLNESS SYSTEM

MEASURE

HRV, sleep, energy daily

ANALYZE

Find patterns weekly

EXPERIMENT

Test one variable (7 days)

INTEGRATE

Keep what works (>5% improvement)

EMERGENCY PROTOCOLS: WHEN PERFORMANCE DROPS

1

WHEN STRESS HITS

1. Box Breathing (2 min) - 4-4-4-4 pattern
2. 10-min walk - Get outside
3. Identify trigger - What caused this?
4. Reframe - "This builds resilience"

2

WHEN ENERGY CRASHES

1. Check HRV - Low = rest day
2. 20-min power nap - Set alarm
3. Protein + water - Fuel up
4. Reduce cognitive load - Easy tasks only

3

WHEN SLEEP IS POOR

1. Morning sun (30 min) - Reset circadian rhythm
2. No caffeine today - Already stressed
3. Light exercise only - No HIIT
4. Early bedtime tonight - Catch up

4

WHEN DECISION QUALITY DROPS

1. Stop making decisions - Defer if possible
2. Eat protein - Glucose for brain
3. 5-min box breathing - Restore prefrontal cortex
4. Consult trusted advisor - Get perspective

RED FLAGS (WHEN TO REST)

Take immediate action if you experience:

- HRV drops >10% below baseline
- Resting heart rate increases >5 bpm
- Sleep quality poor 2+ nights in a row
- Energy levels <5/10 for 3+ days
- Getting sick (sore throat, fatigue)

Action: Take a rest day. No intense exercise, extra sleep, reduce stress.

TRACK YOUR PROGRESS: WEEKLY PERFORMANCE DASHBOARD

EVERY SUNDAY (15 MIN REVIEW)

HRV TREND

- This week avg: _____ ms
- Last week avg: _____ ms
- Trend: ↑ ↓ →

SLEEP QUALITY

- Avg hours: _____
- Avg deep sleep: _____
- Nights on schedule: ___/7

ENERGY LEVELS (1-10)

- Morning: _____
- Midday: _____
- Evening: _____

COMPLIANCE

- Morning routine: ___/7
- Evening routine: ___/7
- Flow blocks: ___/7
- Recovery protocols: ___/7

THIS WEEK'S EXPERIMENT

- Variable tested: _____
- Result: _____
- Keep or discard: _____

NEXT WEEK'S FOCUS

- Priority 1: _____
- Priority 2: _____
- Priority 3: _____

KEY METRICS: WHAT TO TRACK & WHY

HRV

Target: Increasing trend

Why It Matters: #1 recovery indicator

SLEEP DURATION

Target: 7-8 hours

Why It Matters: Cognitive performance

DEEP SLEEP

Target: 1.5-2 hours

Why It Matters: Physical recovery

REM SLEEP

Target: 1.5-2 hours

Why It Matters: Mental processing

RESTING HEART RATE

Target: Decreasing

Why It Matters: Cardiovascular fitness

DEEP WORK HOURS

Target: 10+ per week

Why It Matters: High-value output

PROTEIN INTAKE

Target: 0.7-1g per lb

Why It Matters: Muscle/brain fuel

CAFFEINE CUTOFF

Target: Before 2pm

Why It Matters: Sleep quality

MONTHLY EXPERIMENTS: PROGRESSIVE OPTIMIZATION

Track each experiment for 7 days, keep what improves HRV/sleep/energy by >5%

MONTH 1

- Magnesium glycinate before bed (400mg)
- No alcohol for 30 days
- 12-hour eating window

MONTH 2

- Cold exposure daily (2-3 min)
- Sauna 4x/week (20 min)
- No caffeine after 12pm

MONTH 3

- 16-hour fasting window
- Morning sunlight within 30 min of waking
- Evening coherent breathing (10 min)

FOUNDATIONS

Build core habits:
sleep, nutrition,
supplements

PEAK OPTIMIZATION

Integrate advanced
tweaks and monitor
metrics

PROTOCOLS

Add targeted
practices: cold,
fasting, timing

RESOURCES & TOOLS: YOUR PERFORMANCE STACK

TRACKING DEVICES

OURA RING

\$299-\$399

Best for sleep/HRV

WHOOP STRAP

\$239/year

Best for athletes

APPLE WATCH

\$399+

All-in-one solution

APPS

HRV TRACKING

Elite HRV, HRV4Training

SLEEP

Sleep Cycle, AutoSleep

BREATHWORK

Breathe+, Wim Hof Method

MEDITATION

Headspace, Calm

YOUR PERSONAL STACK (BUILD OVER 12 WEEKS)

Morning:

Midday:

Evening:

Weekly:

SUSTAINABLE PEAK PERFORMANCE

IS A MARATHON, NOT A SPRINT

Remember: Build your stack one protocol at a time.

This is your roadmap to executive excellence. Print it. Reference it daily. Track your progress weekly. Experiment monthly. The compound effect of these protocols will transform your energy, sharpen your focus, and unlock performance levels you never thought possible.

"The quality of your life is determined by the quality of your energy. Master your energy, master your life."

Million Dollar Blueprint - The Executive Energy System
